Subject: Re: Hi

Application Reference: TP/ED/26/0104

Hi there,

I've not managed to see the revised application for the New Lenzie Academy school. However I have read them before and don't think much would have changed. [redacted] attends Lenzie Academy just now and I don't want her exposed to the contamination of the ground.

I also believe the plot wasn't good enough to build on for the SEN school Woodland view and was then rejected by local residents to protect the green space of wildlife. I found the below information via google that back up what I'm saying and I agree with the local community.

- **Protected Greenspace:** Whitegates Park is designated as a protected open space and local wildlife habitat, which has led to widespread local opposition and community campaigns ("Save Whitegates Park"). [1, 2, 3]
- **Contamination Concerns:** A 2018 survey flagged potential soil contamination (including shallow soil risks and brown asbestos) when the site was previously evaluated and rejected for an Additional Support Needs (ASN) school. Council officials state that subsequent remediation and survey work show the land can be made safe for development. [1, 2]
- **Planning History:** Earlier proposals for the land included a rejected 2019 application for 84 residential dwellings, before the site was selected for the Lenzie Academy replacement project. [1, 2]

Kind regards,

[redacted]
