

## **Roll Projections for Kirkintilloch High**

The roll projections include an allowance for known housing development and trends in placing requests e.g the number of placing requests out of the catchment. They are not calculated using actual addresses. It is important to be clear the roll projections below are based on analysis of population data, interpreted through current trends. Should there be changes to current trends – e.g. changes in behaviour around placing requests, unforeseen changes in demographics, other major disruptions to families' behaviours – this will not be accounted for in the projections, and they will not be accurate. It is also important the projections are not taken to be exact predictions. They are intended to provide a guide to likely levels of school population, and we would expect them to be correct in terms of the likely direction of travel, but not to provide accurate numbers.

The capacity of Kirkintilloch High is 850, with a cap of 150 in S1.
