

Have your say on the Glazert Water

**Come along and find out
about plans to restore the
Glazert River**

We are holding a public engagement event for residents to learn about proposals to transform the Glazert and surrounding area.

The plans aim to:

- Provide flood risk benefits and make the area more resilient to extreme weather
- Improve the quality of wildlife habitats
- Improve the amenity and recreational opportunities along the river
- Improve and restore the Glazert Water to a more natural condition

Council officers, a SEPA Water Environment Fund representative and project consultants from cbec eco-engineering will be available to answer your questions on the options. Your views will help shape the future development.

**Come along to: Lennoxton Community Hub,
Thursday 19 March, 3-7pm**

Get Involved

If you can't come to the drop-in event then join the conversation online and give us your comments.
