Stance: Customer made comments in support of the Planning Application

Comment Reasons:

Comment: The children in Lenzie need a new school building. To build on the current Myrtle Avenue site is not a viable option. There are over 1000 children walking to, from and around the site daily, in addition there is a primary school nearby and access is tight. To introduce construction and construction traffic into this area and maintain a functioning school is not feasible.

The Whitegates site may not be perfect but it is the best option. However I would want assurance that the contaminated ground is safe not only for the pupils life at the school (6years) but also for the staff who may be working on that site for 20+ years.

The plans are sympathetic to the environment and will make use of an area that is essentially unused.
