Commenter Type: Neighbour

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: The proposed site totally destroys the existing park and wild habitat of many wild animals. Other sites are available but have not been fully explored, the Whitegates park site seems the easy option. My property backs onto the park and initially we were told that as many of the mature trees at the rear of our property would be kept to offer some privacy and noise and light barrier from the new school. We can see now that all those promises have been broken and all the mature trees are being removed in the plan. Additionally there are now plans for a path to run at the rear of our property which increase the foot fall and increases the risk of security breaches to our property. This path will bring increased traffic from the school children which will lead to issues with littering and loitering in this area.

I believe the increased noise and light pollution will impact adversely on our quality of life and affect the price of our property.

The road infrastructure around the school is already under pressure and will not sustain the increased traffic in the area.

The soil investigations have highlighted issues with pollution in the ground on the site which will not be removed and just built over the top off, how on earth does that make sense?
