Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: It's a safe and enclosed park.

I'm conscious the footfall measures were bias as they did not capture the entry points of the main park itself given there's two entrances.

The land is contaminated, living next door, you haven't shared the potential risk to my future health. I'd like to understand if the contamination could be cancerous- had this hazard been risk assessed?

There is also flood risk, again please provide the reassurance and confirm what compensation you will offer to protect our homes and future insurance.

There is a lot of wildlife (I walked past and could hear so many frogs/toads!), I've seen a heron, deer, foxes, hedgehogs, newts, woodpecker and sparrowhawks, emperor dragonfly, squirrels. Removing the park would disrupt their home unnecessarily.
