

## Section 6- Sustainability

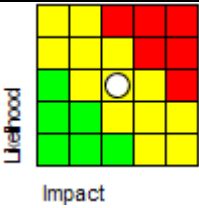

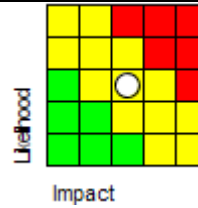

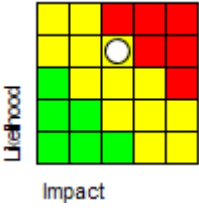

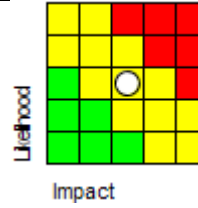

The Service considers and summarises how it is responding to issues raised through the SEA process and how it is contributing to meeting the objectives set out in the Council's Sustainability & Climate Change Framework and emerging Climate Action Plan, particularly in relation to delivery of commitments for which the service is responsible.

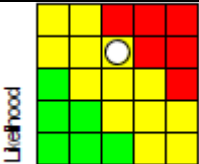

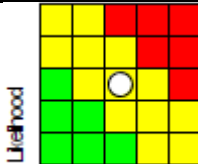

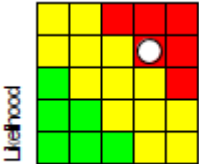

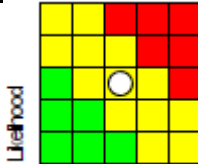

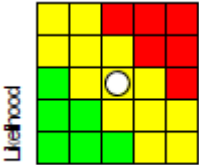

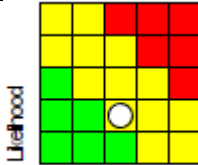

| Service activity  | Impacts on climate change mitigation   | Impacts on climate change adaptation   | Impacts on biodiversity   | Impacts on greenspace   | Other sustainability impacts   |
|---|--|--|---|---|--|
| Delivery of statutory duties in relation to air quality management  | Air quality funding used to support the EcoStars road fleet recognition scheme which aims to minimise greenhouse gas emissions   | Minimise pollution airborne  | Minimise pollution  | Improved amenity for greenspaces through reduced air pollution in recreational spaces.  | Minimising pollution to air and improves health outcomes and reduces the strain on the NHS,  |
| Contaminated land   | Promote the remediation of potentially contaminated land received via the planning process along with the monitoring of sites of historic landfill-in.                             | Land affected by contamination is appropriately assessed using and remediated.   | There is the potential disturbance of habitats via the reclamation of site likely to be contaminated sites.   | Improved environmental health reduces likelihood of pollution.  | The provision of pollution free surroundings is clearly advantageous to biodiversity, thereby ensuring that such land contribute to sustainable communities. |
| Contribute to Climate Action Plan and Local Heat & Energy Efficiency Strategy, including via ongoing CLD Plan climate emergency skills work, and alignment of Locality Plans with CAP ambitions | The CAP/LHEES will provide a clear strategic approach to improving energy efficiency and decarbonising homes, tackling fuel poverty and reducing emissions from the housing stock. | The CAP will set a framework to build resilience to enable communities to adapt to the impacts of climate change. This is particularly critical for our most vulnerable communities. | Nature based solutions to climate change and provide a wide range of co-benefits for our places and communities as well as helping capture carbon and supporting resilience to the effects of climate change. | The Service will contribute to both the CAP and Greenspace Strategy, which will be mutually supporting – see Greenspace Strategy below. |  |

|  |   |  |   |  |  |
|--|---|--|---|--|--|
|  |   |  |   |  |  |
| Food Growing Strategy  | Food growing strategy can help reduce embodied emissions associated with food production due to minimised transport and processing. | Allotments act as natural carbon sinks to absorb emissions and act as natural flood alleviation schemes                                | Development of these sites can act to increase biodiversity through increased pollination opportunities and habitat creation                                | Allotments can act as extensions to greenspace or be integrated as part of the landscaping                             | Food growing opportunities as benefits of promoting such activities through community groups and local schools as educational programmes, with positive health and wellbeing elements. |
| Greenspace Strategy  | Community empowerment to deliver nature-based solutions to climate change   | Improving climate resiliency for communities in EDC through provision of quality green and natural spaces and non-vehicular transport. | Implementation of nature-based solutions provides nature-based solutions supporting pollinators and creating habitat.                                       | Improved amenity greenspace benefiting climate and communities.  | Improved health & wellbeing and opportunities for community cohesion   |
| Oversee delivery of sustainability guiding principle in LOIP | Delivery of sustainability guiding principle has climate change mitigation benefits.  | Delivery of sustainability guiding principle has climate change adaptation benefits  | Delivery of sustainability guiding principle has biodiversity benefits  | Delivery of sustainability guiding principle has greenspace benefits.  | Delivery of sustainability guiding principle has wider benefits e.g., health & wellbeing   |
| Pollution Control  |   |  | Prevention and removal of offensive waste from open spaces will contribute to the provision, maintenance and improvement of biodiversity in natural spaces. | The absence of waste and pollution from greenspace will encourage use and contribute to physical and mental wellbeing. |  |

|  |   |  |  |   |  |
|--|---|--|--|---|--|
| Embrace Smart / Remote Working across Community Services including improving use of ICT solutions and reduction of unnecessary travel. | Reduction to carbon and other greenhouse gas emissions. | Minimise fumes and pollution and energy usage through travel | Reduced traffic on roads results in fewer vehicle collisions with fauna. Improved air quality increases habitat for less pollution tolerant species. | Improved amenity for greenspaces due to reduced air pollution, and safety for children and young people from less vehicles. | Less traffic use, giving less air pollution and more sustainable environment.<br><br>Less paper usage through use of ICT solutions, leading to less de-forestation and sustainable future. |
|--|---|--|--|---|--|

## Section 7- Risk Management

| Description   | Treatment Strategy | Internal Controls   | Category(s)                   | LOIP Outcome(s)  | Current Risk Matrix   | Target Risk Matrix  | Linked Actions  |
|---|--------------------|---|-------------------------------|--|---|---|---|
| Failure to effectively manage significant cases of animal disease or human illness / disease and/or outbreak events | Tolerate           | Welfare Controls<br>Qualified Resourcing<br>Training<br>Partnership Liaison | Social                        | Local Outcome 3<br>Local Outcome 4<br>Local Outcome 5<br>Local Outcome 6 |  |  | None  |
| Failure to deliver statutory requirements of Environmental Health and Trading Standards                             | Treat              | Resourcing<br>Vacancy Recruitment   | Political<br>Legal/Compliance | All  |  |  | <p>Recruitment and making EDC attractive place to work.</p> <p>Working with Chief Officers / Institutes to provide qualifications nationally.</p> |

|  |       |  |                                  |  |  |  |   |
|--|-------|--|----------------------------------|--|--|--|---|
| Inability to effectively manage the national resettlement agenda   | Treat | Appropriate Resourcing<br>Government Funding<br>Support Services.  | Political<br>Social              | All  | <br>Likelihood<br>Impact  | <br>Likelihood<br>Impact  | Awareness at national level<br>For continued funding and access to services             |
| Inability to supply appropriate homeless temporary accommodation   | Treat | Housing Options<br>Housing Provision<br>Resourcing   | Political<br>Social<br>Financial | Local Outcome 3<br>Local Outcome 4<br>Local Outcome 5<br>Local Outcome 6 | <br>Likelihood<br>Impact  | <br>Likelihood<br>Impact  | Housing supply increased.<br><br>Financial resources provided / grants from Government. |
| Inability to Deliver Community Empowerment requirements including LOIP and to support Community Planning Partners and Local Outcomes | Treat | Resourcing<br>Positive Partnership<br>Working and relationships.<br>Community capacity planning and building | Political<br>Social              | All  | <br>Likelihood<br>Impact | <br>Likelihood<br>Impact | Recruitment<br><br>Streamlined structure.<br><br>Increased community empowerment        |
