Tick to indicate a factor to be considered

Door Location	Corridor?	Toilet Area .	Fire Door?	I=Internal Door E= External Door	Self -Closure .	Heavy Door?	Congregating/ Queuing Area .	Entrance/ Exit?	Unsupervised Area?	Susceptible to Gusts of wind .	Other?	Risk Rating H= High M=Medium L=Low	Action Required Y/N	Action Taken	Date Completed

DOOR CHECKLIST – FINGER ENTRAPMENT

The extent of the risk posed by each door or gate to people depends on: -

The likelihood of young children or vulnerable people being in a position to place their fingers in any pinch point that exists which could be influenced by

- the position/use of the door/gate
- frequency with which young children or vulnerable person(s) use it
- the likelihood that young or vulnerable person(s) will congregate next to a door/gate, with limited close supervision, e.g., queuing for lunch or toilet facilities
- the age and physical/mental abilities of children/vulnerable person(s)
- level of supervision and control exercised over children/vulnerable person(s) when using the door

The above factors need to be considered to establish a risk rating (High, Medium, Low) for each door.

For further guidance on the risk assessment process, please contact the Health and Safety Team by telephoning 0141 777 3210 Mon-Fri between 09:00hrs and 17:00hrs or alternatively email at health.safety@eastdunbarton.gov.uk.
