Case Officer: Fraser McNair

Customer Details

Comment Details

Commenter Type: Neighbour

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I wish to object to the proposed application on the following grounds. The increased traffic which will undoubtedly occur on my street during school opening and closing times, which would create significant risks for local residents, pedestrians, cyclists, and road users. The loss of significant area of natural woodland and park area which I frequently use. The loss of natural habitat to some rare species in the proposed area coupled with a significant adverse environmental impact and failure to adequately protect or enhance biodiversity. The disruption cause to a site that has previously been rejected due toxic chemical content and peat wetlands with associated water table disruption. The potential for airborne pollution and toxic chemical release during the removal of contaminated soil in the groundworks phase of the project. The failure of the council to comply with local conservation policy.
