Comment Details

Commenter Type: Neighbour

Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: I object to this application on a number of grounds as itemised below:

- * Contamination of the ground is unacceptable to be used as a school site as previously stated during the previous ASN school development.
- * The site of this proposed school development removes it from the centre of the town, where the existing school is situated. leading to more car usage, traffic and disturbance. this new site is also situated next to initiative road which students will likely opt to walk down to reduce their walking distances.
- * The cost for the development is extremely high when compared to projects of a similar size and nature.
- * The reuse of the existing school site with a tandem build option has not been adequately reviewed with the option to use the adjacent rugby club grounds for PE during building works, with PE lessons potentially doubled up through the week to allow for the additional time needed to travel to the fields.
