Stance: Customer objects to the Planning Application

Comment Reasons:

Comment: The location is not in Lenzie - the post code on the application does not match the site for building.

I object due to the health hazard of disrupting the soil for all pupils now, and years to come. This site has already been rejected for a school build.

I object due to the environmental impact of destroying an established well used green space - such established areas cannot be recreated.

The entire railway path will be destroyed due to need for lighting and paving to ensure safety and a well established link from Lenzie to Kirkintilloch will be removed. There is already significant damage to the area.

Middlemuir is not a feasible access point and will cause huge implications for residents to volume of parking, limited parking and many junctions close to the access point. It is unsafe for parents and pupils as it is not fit for the volume of traffic.

I am concerned regarding the use of the land on myrtle avenue, it will not be possible to recreate an established green space and I am concerned it will be sold to builders for profit in years to come.
